KPLR-TV, St. Louis, Mo. - Homeowners near Bridgeton Landfill seeking more settlement options - 6/22/14 - Thursday Missouri Attorney General Chris Koster announced a settlement had been reached with the owners of the Bridgeton Landfill. But on Sunday, homeowners and neighbors near the landfill met with a new lawyer to discuss their options.

Politico - Supreme Court nibbles at EPA's greenhouse gas powers - 6/23/14 - The Supreme Court partially upheld and partially rejected a set of early EPA greenhouse gas regulations for industrial pollution sources Monday, in a largely symbolic case that as expected left the agency's powers over carbon pollution almost entirely intact.
<http://www.politico.com/story/2014/06/supreme-court-epa-early-greenhouse-gas-rules-108181.html>

The New York Times - Justices, With Limits, Let E.P.A. Curb Power-Plant Gases - 6/23/14 - The Supreme Court on Monday handed President Obama's Environmental Protection Agency a victory in its efforts to regulate greenhouse gas emissions from stationary sources like power plants.

The Guardian - Corn farming in the midwest heavily taxes water resources and supply - 6/23/14 - Fueled by national ethanol mandates, livestock feed demand and growing exports, US corn production has nearly doubled in the past two decades and is now the nation's biggest cash crop. Last year's record harvest was nearly 14bn bushels, enough corn to fill a freight train that can circle the earth. Only 10% of the corn is for direct human consumption.

Radio Iowa - Environmental group says Ottumwa pork plant has big impact on waterway - 6/23/14 - A report released by the group Environment Iowa lists Cargill Meat Solutions' pork processing plant in Ottumwa as the state's number one disposer of toxic chemicals into waterways. In 2012, Cargill disposed of more than 2.8 million pounds of chemicals into the Lower Des Moines River.

KWWL-TV, Waterloo, Iowa - Justices limit existing EPA global warming rules - 6/23/14 - The Supreme Court on Monday placed limits on the sole Obama administration program already in place to deal with power plant and factory emissions of gases blamed for global warming.
<http://www.kwwl.com/story/25844929/justices-limit-existing-epa-global-warming-rules>

New Republic - Maybe Those EPA Rules Aren't Quite Such a Big Deal - 6/22/14 - Forget the bluster from fossil fuel groups and coal state representatives. And don't pay so much attention to the administration's bragging. The Environmental Protection Agency's new rule about carbon pollution from power plants isn't that stringent. That's why major environmental groups, though pleased to see the new rule, are quietly pushing the Administration to make it even stronger before it becomes final. The planet, they say, can't wait for progress.

Wichita Eagle - Supreme Court limits EPA power to regulate greenhouse gas pollution - 6/23/14 - A fractured Supreme Court on Monday limited but did not eradicate the Environmental Protection Agency's power to regulate certain greenhouse gas emissions.

KCUR Radio, Kansas City, Mo. - EPA Grants May Help Redevelop Parts Of Kansas, Missouri - 6/23/14 - The EPA has awarded \$1.2 million for projects in a 15-county area of northeast Kansas and northwest Missouri. The money will be used to redevelop underused or abandoned properties, and to train residents and help them land environmental jobs.
